

LOCK IN
SAFETY

with a hydraulic
truck restraint.

TRUCK RESTRAINT METRO DOCK HYDRAULIC RESTRAINT

The Metro Dock Hydraulic Restraint features an arm that secures the trailer to the truck's ICC bar, preventing movement. The single-button control panel, combined with exterior traffic lights, facilitates clear communication between the leveler operator and the driver by indicating the restraint's status. Can also be interconnected to an existing hydraulic dock leveler.

FEATURES

Secure Hydraulic Arm: Secures the truck ICC bar with 30,000 pounds of restraining strength, preventing trailer movement.

Durable and User-Friendly: The low-profile, non-impact design is zinc-plated for corrosion resistance with a manual release valve and easy-access maintenance cover.

Efficient Control and Communication: The single-button control panel with light communication package, ensure efficient communication between operator and driver.

BENEFITS

Enhanced Safety: Securely holds trailer in place and minimizes truck movement during loading/unloading.

Easy Operation: User-friendly controls with enhance clear communication and manual release for power failure situations.

Low Maintenance: Durable construction, resists corrosion extending product lifespan.

Reliability. Durability. Excellence.

HYDRAULIC TRUCK RESTRAINT

STANDARD FEATURES

SPECIFICATIONS

- 30,000 lb. restraining strength
- Interconnected to existing hydraulic dock leveler
- NEMA 12 control panel with single-button control
- Manual release valve in case of power failure
- Zinc plated against corrosion
- **Communication Package:**
 - Exterior red/green LED lights
 - Exterior mirrored image warning sign
 - Interior control panel with red/green/amber lights

OPTIONS

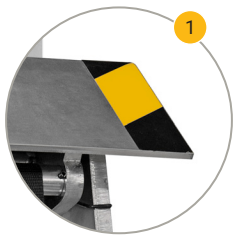

- Available in any voltage
- Cantilever brackets
- Remote powerpacks for use with mechanical dock levelers
- Protective guards
- Additional options available

ENHANCED
SAFETY.
**SECURE
HOLDING.**

Communication Package

Interior/exterior lights, mirrored image warning sign and control panel provide safety updates for drivers and warehouse personnel.

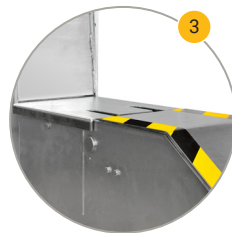

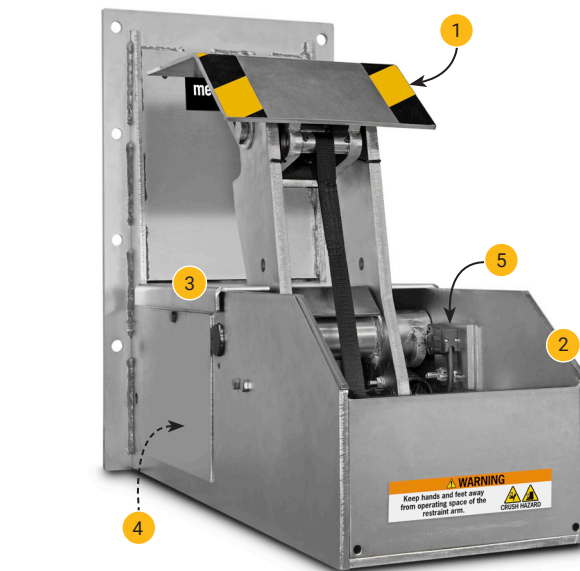

Constant Pressure Head

The restraining arm allows the truck to float but not creep away from the loading dock.

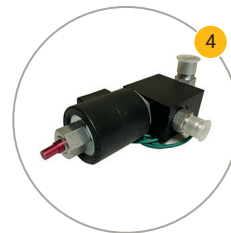

Low Profile Housing

Prevents ICC bar impact, prolonging the life of the restraint.

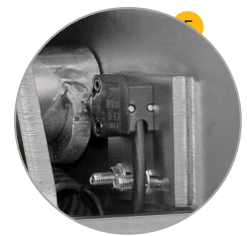

Maintenance Cover

Provides easy access.

Manual Release Valve

In case of power failure.

Limit Switch

Ensures the arm is properly engaged and released, and triggers an audible alarm if the ICC bar is not detected to maintain safety compliance.
